Declaration on the EU Packaging and Packaging Waste Regulation (PPWR)

RINNERT GmbH & Co. KG closely monitors the ongoing developments related to the EU Packaging and Packaging Waste Regulation (PPWR) and is currently assessing the resulting requirements for our products and business processes.

As part of this assessment, we are reviewing the relevant legal provisions and the associated obligations to ensure timely and compliant implementation. Since certain definitions and responsibilities within the Regulation are still subject to interpretation, these requirements are currently being evaluated internally.

Once this assessment has been completed, we will implement the necessary measures and, where appropriate, inform our customers and business partners of any relevant actions or changes.

Based on our current knowledge, we do not use any packaging materials that are subject to the restrictions currently proposed under the PPWR. Furthermore, we understand that reusable cardboard packaging is generally not affected by the relevant provisions of the Regulation.

We will continue to monitor regulatory developments and update our assessment and processes as necessary should additional requirements arise from the further interpretation or implementation of the PPWR.

Should you have any questions, please do not hesitate to contact us.

Best regards,

Eric Rinnert
CEO
