

01. July 2026

Declaration on REACH Regulation (EC) No. 1907/2006

RINNERT GmbH & Co. KG is committed to complying with the requirements of Regulation (EC) No. 1907/2006 (REACH) and continuously monitors updates issued by the European Chemicals Agency (ECHA), particularly regarding the Candidate List of Substances of Very High Concern (SVHC).

We regularly review our products and the information provided by our suppliers against the current REACH Candidate List and ensure that all applicable legal information obligations are fulfilled.

In accordance with Article 33 of the REACH Regulation, we hereby inform you that the substance Lead (EC No. 231-100-4, CAS No. 7439-92-1) may be present in certain metallic components.

As many of our products are manufactured from metallic materials such as brass, steel, or stainless steel, the lead content of certain products may exceed the threshold of 0.1% by weight, unless these products are explicitly designated as lead-free or otherwise specifically identified.

Should future amendments to the REACH Regulation or updates to the SVHC Candidate List result in additional information or notification obligations, we will implement the necessary measures accordingly and inform our customers as required.

Should you have any questions, please do not hesitate to contact us.

Best regards,

Eric Rinnert
CEO
